Immediate Joiner

PROFESSIONAL SUMMARY

Computer Science graduate with 1 year of combined hands-on experience in Cloud DevOps, AWS infrastructure, CI/CD automation, containerization, and Linux administration, including a 6-month DevOps internship at Cloud DevOps Hub and 6 months of freelance and real-world project experience. Skilled in AWS, Linux, Docker, Jenkins, GitHub Actions, Terraform, and CI/CD automation. Experienced in provisioning AWS infrastructure, automating deployments, containerizing applications, and managing Linux-based environments. Seeking a Junior DevOps / Cloud Engineer role.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, IAM, VPC, RDS)

DevOps & CI/CD: Docker, Jenkins, CI/CD Pipelines, Kubernetes (Basic), GitHub Actions

Infrastructure as Code: Terraform, Ansible

Monitoring & Observability: Prometheus, Grafana

Web & Application Servers: NGINX, SSL/TLS, Reverse Proxy

Databases: MySQL, SQL

Programming & Scripting: Python, Java

Version Control & Operating Systems: Git, GitHub, Linux (Ubuntu), Windows

Cloud Networking: TCP/IP, CIDR, Subnetting, DNS, HTTP/HTTPS, SSH, Routing, NACLs, Network Troubleshooting

EXPERIENCE

Cloud DevOps Engineer Intern

Dec 2025 – June 2026

CloudDevOpsHub | Verify

- Provisioned and managed AWS cloud infrastructure including EC2, IAM, VPC, and S3 using Terraform (IaC), improving infrastructure consistency and reducing manual provisioning effort.
- Designed and implemented CI/CD pipelines using Jenkins and GitHub Actions to automate build, testing, release, and deployment workflows.

Dhanya Traders — Corporate Website & Admin Dashboard

Oct 2025 - Nov 2025

Freelance | Live

- Designed a secure JWT/bcrypt-based admin dashboard, enabling the client to independently manage inquiries and contact submissions via MongoDB Atlas.
- Managed end-to-end application deployment using Docker, NGINX, and SSL/TLS, delivering a production-ready application on AWS EC2.

PROJECTS

Starbucks Clone CI/CD Pipeline Deployment | GitHub

March 2026 – May 2026

Tools: Jenkins, Docker, AWS EC2, GitHub, Node.js, Ubuntu

- Designed and implemented an end-to-end CI/CD pipeline using Jenkins to automate build, testing, containerization, and deployment of a web application on AWS EC2.
- Built an end-to-end CI/CD pipeline using Jenkins and Jenkinsfile and deployed the application on a secure Ubuntu-based AWS EC2 environment with Docker and AWS Security Groups.

Netflix Clone: End-to-End DevSecOps CI/CD Pipeline | GitHub

Aug 2026 - Sept 2026

Tools: AWS EC2, Jenkins, Docker, SonarQube, Trivy, Prometheus, Grafana, Kubernetes (kind), Helm, Linux

- Built a Jenkins CI/CD pipeline on AWS EC2 integrating SonarQube, OWASP Dependency-Check and Trivy scans, Docker Hub image push, automated container deployment and email build alerts.
- Implemented Prometheus and Grafana monitoring of the EC2 host, and GitOps deployment to Kubernetes using ArgoCD with automated sync and self-heal.
- Resolved resource constraints on a 1 GB instance (2 GB swap, Docker/Jenkins cache cleanup, fault-tolerant catchError and timeout stages) and debugged Java, Docker permission and NVD API key issues.

Secure CI/CD Pipeline for a 3-Tier Application (DevSecOps) | GitHub

Sept 2026

Tools: AWS EC2, Jenkins, Docker & Docker Compose, Trivy, SonarQube, Linux, CI/CD, Shift-Left Security

- Built a 7-stage Jenkins pipeline on AWS EC2 that runs Trivy scans and SonarQube analysis (Quality Gate passed), then builds, pushes and deploys a Flask + MySQL app with Docker Compose.
- Configured Docker Hub integration and Jenkins credentials to push images automatically, and archived Trivy vulnerability reports as build artifacts.

EDUCATION

Chandigarh University | Bachelor of Engineering in Computer Science Engineering

Jun 2022 – Jun 2026

Specialization: Cloud Computing | Chandigarh, India

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
Deloitte Australia – Data Analytics Job Simulation
Google AI Essentials
Training on Cloud Computing with AWS - Internshala
